In the July, August, and September 2013 releases, 23 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

1. Intake: Generate Report displays section not visible on the Intake screen **Resolution**: Corrected the Generate Report functionality to only display sections visible on the Intake screen.

2. Automatic logoff: Automatic logoff does not occur if there required fields that are left blank when creating a new record **Resolution**: Previously, when the system was supposed to time out, if there were incomplete fields or errors saving the record the system would not logout. This has been resolved.

3. Tx Plan Draft - Activate: Unable to make a draft plan active if another plan is active **Resolution**: Previously, upon clicking to make the inactive draft plan the active version the system would prompt you to save changes, even if you had already saved the changes. The system now correctly allows an inactive draft to become the Active plan which makes the previous Active plan status Inactive - old version.

4. Admission: Clicking on the Generate Report button was causing a yellow screen error **Resolution**: Previously the Generate Report button on the Admission screen would create a yellow page, this has been resolved.

5. Scheduler: The Edit Recurrence button was missing **Resolution**: The Edit Recurrence button is now available for all instances.

6. Client Profile: A yellow screen was occurring when navigating to Other Numbers Directly From Any Client Profile Sub-Menu Screen Outside of the Client Profile 'Unit of Work' **Resolution**: A yellow screen no longer occurs when clicking Other Numbers on the menu while currently on any screen in the client profile sub-menu that is not part of the client profile unit of work (i.e. any screen not factored into client profile record completeness such as Allergies, Authorization, CGE, History, Client External History, etc).

7. Consented activity list: A yellow screen was occurring when reviewing a consented admission and discharge **Resolution**: Previously when reviewing consented Admission or Discharges, the system returned an error. This has been resolved.

8. Treatment Plan/Review: Insert failed error when saving or reviewing **Resolution**: The insert failed error is no longer received when attempting to edit, save, or review a Treatment Plan or Treatment Review.

9. Vital Signs: Warning message showing for all heights with feet = 4 **Resolution**: The warning message "The Height Measure (Feet) should be greater than 4 and less than 10." no longer appears when height ft. = 4 and inches is set to anything other than "0" (Inches is greater than 0).

10. Client Profile: Yellow Screen when adding other number subsequent to adding multiple collateral contacts **Resolution**: There is no longer a yellow screen error when adding an "Other Number" after adding multiple "Collateral Contacts".

11. Consented Data: Consented Profile, Intake, Admission, and Encounter info showing hidden fields **Resolution**: The Consented info for the Profile, Intake, Admission, and Encounter screens now correctly only displays the info that is on the original Profile, Intake, Admission, and Encounter.

12. Scheduler: The Cancel, Save, and Edit buttons were cut off on Recurrence Edit window **Resolution**: The recurrence window has been enlarged and a scroll bar has been added to prevent the cancel, save, and edit buttons from being cut off.

13. Encounter: Signed Notes and Unsigned Notes fields show strange formatting **Resolution**: Corrected an issue where the Signed Notes and Unsigned Notes fields would be incorrectly formatted when using Generate Report.

14. Discharge: The prompt at completion of Discharge to close the case does not appear **Resolution**: The prompt at completion of a Discharge to additionally close the case is now appearing for staff having the following role combinations:
    1. Clinical Full (Without Non-Treatment Team)
    2. Intake(full) and Discharge(full)
    3. Intake (full), Discharge (full) and Non-Treatment Team Access

15. Continuing Care: Yellow screen when clicking add new check-up **Resolution**: When selecting Add A New Check-Up prior to entering any information you will now see the following error message: "Continuing care checkup cannot be created before creating continuing care overview."

16. Fee Screen: Unable to enter new fees **Resolution**: Staff having the 'PS Court (Full Access)' role are now able to add, edit, and delete fees.

17. Collateral Contacts: When accessing collateral contacts from other screens clicking Cancel doesn't return user to the screen they came from **Resolution**: When accessing collateral contacts from Intake, Admission, and Tx Team, clicking cancel now returns users to the screen that the user came from.

18. Admission: Yellow Screen When 'Months employed or in Voc/Ed Training' on Financial/Household screen is greater than 12 **Resolution**: The error message "Months employed or in Voc/Ed Training in last 12 months must be less than or equal to 12." now appears when entering a number greater than 12.

19. Collateral Contacts: Save button incorrectly appearing and causing a yellow screen **Resolution**: The Save button no longer appears upon editing the "Gives Permission To Treat?" field since SAVE should not appear when this screen is in insert/edit mode.

20. Encounter: Insert failed error upon release to billing for a client with one CGE and Add on Service **Resolution**: An "Insert failed" error no longer occurs when trying to release an encounter having an Add-On service for a client having only one CGE.
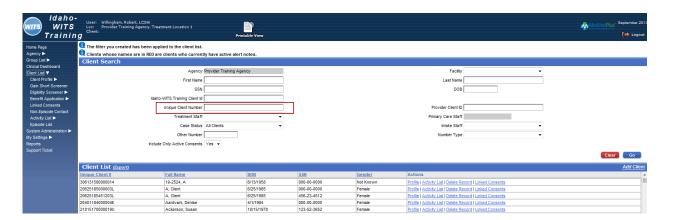

21. Admission: Diagnosis Axis V and GAF Score error messages **Resolution**: The error message "Axis V / GAF Score must be less than or equal to 100." is now displaying when the "Highest GAF score in last year" field is higher than 100. Also, the error message "The Highest GAF Score in past 12 Months field is an invalid integer format." has been changed to "The Highest GAF Score in last year field is an invalid integer format."

22. Group Notes/Encounter: Encounter created has a different service than the group session **Resolution**: Upon creating an encounter from a group session when the selected service has a modifier, and another service exists with the same procedure code, no modifier, and a future end date, the encounter was being populated with the un-modified future-expired service. The service selected in the group session will now be carried forward to match on the encounter.

23. Program Enrollment: Yellow Screen upon Making Program Name Blank **Resolution**: A yellow screen no longer occurs when blanking out a previously selected value for the Program Name dropdown.

Below you will find a summary of the changes to WITS for the July, August, and September 2013 release (which took place September 25, 2013). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top right portion of your screen will say September 2013.

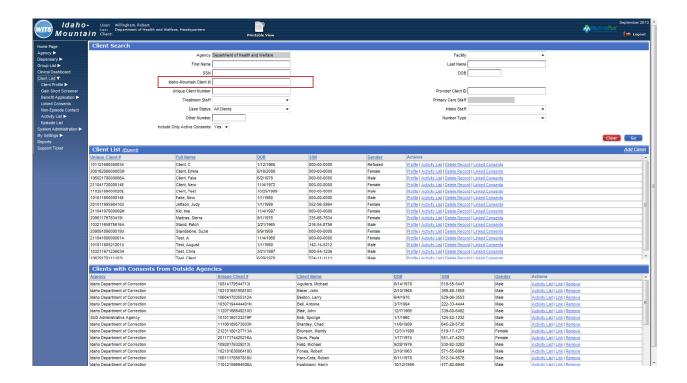

Client Profile

1) Occurrences of the Unique Client Number with the label "Client ID" were re-labeled to "Unique Client Number. An informational message was added to the client search when no matches are found using the Client ID search parameter.

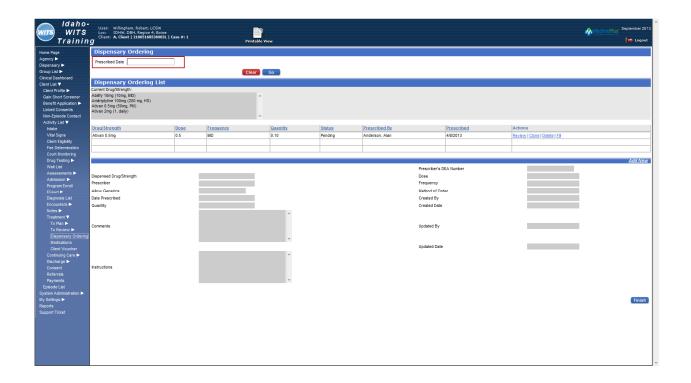

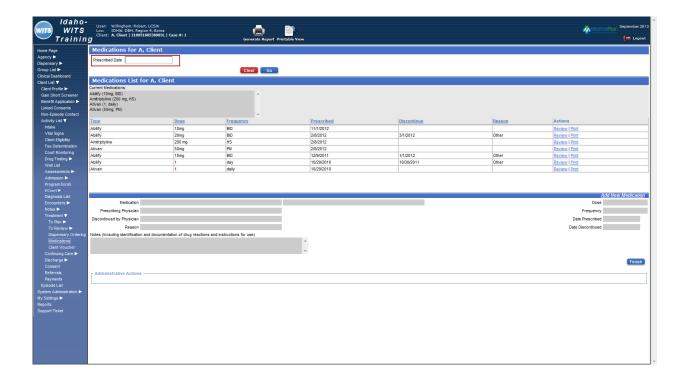

2) The "Idaho-Mountain Client ID" or "Idaho-Pacific Client ID" field has been added to the Client List Search to allow users to search for clients based on the Client ID (not the Unique Client Numbers)

Dispensary Ordering

A "Prescribed Date" search filter was added to the Dispensary Ordering and Medications Screens, and changes were made to the formatting of the headers and list titles.
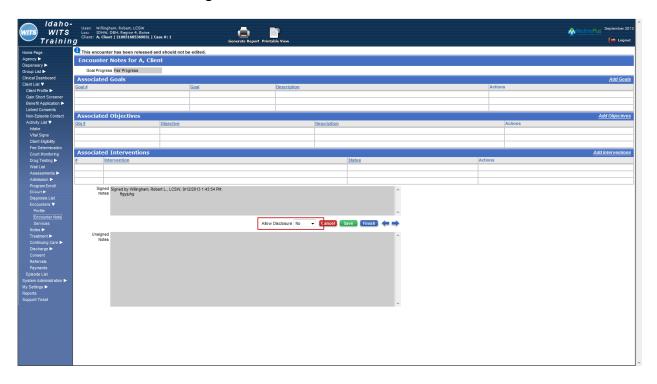

Drug Test Results

The Drug Test Results Profile was updated to retain data in memory for specific Client Outcomes and the "Marijuana Content" field was enabled for the "Positive – Excused" test result.

Encounter

The "Release This Note?"/"Allow Disclosure" indicator was made editable on the Encounter Narrative once the Encounter was Released to Billing.

Staff Signatures

The new standard format for staff name and credentials (Last, First MI., Credentials) is now displaying on the following locations – Signed Notes on Encounter, Misc. Notes, Non-episode Contact and Signed Resolution Note on Support Ticket
